CIPHA NEWS

A weekly newsletter brought to you by CIPHA

VOL. 1, ISSUE 10

15 DECEMBER 2020

Please circulate this Newsletter to your colleagues.

CIPHA is the Cheshire and Merseyside COVID-19 integrated data platform which provides live data in the form of dashboards for clinical direct care and for Intelligence teams.

This data comes from Acute Trusts, General Practice, Community, Mental Health, Local Authority and 999,111 live data feeds.

Please contact us at <u>CIPHA@merseycare.nhs.uk</u> for further information on any of these reports.

The C&M DsPH are sincerely thankful for all your hard work in establishing the CIPHA Platform.

It is an amazing achievement and the speed in which the Platform was set up, in the most challenging of circumstances.

You have enabled DsPH, local PH teams and also key strategic groups within the Local Resilience Forums to have access to the data and inform their planning and understanding of the pandemic.

DsPH recognise we are on a journey and appreciate the co-production as we refine the reports and consider future opportunities for the platform.

On behalf of the Champs DsPH

COVID-19 NIMS Vaccination

COVID-19 NIMS Vaccine Report

The COVID-19 Vaccination Report provides aggregated data for the Cheshire and Merseyside population with specific reporting for NHS and Social Care.

It will also provide:

Analysis of the COVID-19 vaccination status for an

Live Reports

COVID-19 SMART Testing Report

This SMART report is now available across Cheshire and Merseyside, it provides near real time uptake of the PCR and LFT, it displays uptake by ward, test site and is also cut by the population characteristics of age, sex, deprivation, ethnicity and test reason.

This report shows flu vaccination invitation and uptake rates stratified by different characteristics including age, condition and deprivation, and BAME.

COVID Monitoring & Tracking

This report shows cases, suspected cases and testing hotspots, with geographic and patient level drill down for those involved in the front line response.

COVID Epidemiology

This report shows stratified cases, suspected cases, mortality and people receiving tests by characteristics including age, condition, deprivation and BAME, and over time.

COVID Test Capacity (Labs)

This report shows laboratory capacity for COVID PCR tests.

COVID Test Results on Admission

This report will enable hospital trusts to access COVID test results for patients who are admitted into their hospital. The report works on the basis of a NHS number or name look up and returns any COVID results for that individual, if one exists.

COVID Out of Hospital Capacity & Demand

This report shows capacity and demand for hospital, ready for discharge, care homes, domiciliary care, mental health and community providers.

COVID National and Local Sitrep

This report shows COVID cases, mortality and admissions. It compares trends over time and compares rates by different geographies and providers.

This report shows the number of COVID admissions and bed availability in hospital trusts.

Reports in Development and available in the coming weeks

COVID Third Wave Planning – New Report Areas

Reports are being developed to enhance the Out of Hospital Capacity and Demand Model. Further details will be available in the next Newsletter.

COVID In Hospital Demand Prediction Tool

This report uses the University of Manchester hospital capacity model to predict Acute and ICU bed capacity. These predictions are mapped against existing data from actual bed occupancy up to the current day.

The aim is to fit a multi-state model to hospital level data on COVID-19 patients. This then forecasts bed occupancy based on chosen future admissions scenarios, which can aid bed management by showing how many beds are likely to be required by COVID-19 patients.

This Tool is available to Trusts who have currently provided HL7 messages.

Clinical Outcomes Radar

Access to Reports

Date	Users
w/c 14 December 2020	731

The account roll out process to access the CIPHA platform and available reports is now progressing.

We have written to the CCGs to sign up CIPHA access for GPs and teams within Practices, if you

have not yet completed your access request, please contact us. We have a high number of requests

to process and we are working through them as quickly as possible. If your access is urgent please

contact kirsty.brown2@sthk.nhs.uk .

Engagement of users is governed by a the CIPHA RBAC process. This process has been approved by

the CIPHA Governance Board and the Data Access and Asset Group (DAAG). DAAG membership

includes representation from stakeholders and citizens.

Access to Flu Vaccination Report

We have written out to colleagues offering access to the NIMS Flu Vaccination Report. If you need access to

this report please complete the **<u>NIMS user access spreadsheet</u>** attached and return to <u>kirsty.brown2@sthk.nhs.uk</u>.
