CIPHA NEWS

A weekly newsletter brought to you by CIPHA

CIPHA is the Cheshire and Merseyside COVID-19 integrated data platform which will provide live data in the form of dashboards for clinical direct care and for Intelligence teams. This data comes from Acute Trusts, General Practice, Community, Mental Health, Local Authority and 999,111 live data feeds.

The CIPHA platform has GONE LIVE for user groups this week

- ## Live Reports

COVID National & Sitrep

This report shows COVID cases, mortality and admissions. It compares trends over time and compares rates by different geographies and providers.

- ## Reports Moving into Live this week

COVID Testing Report

This report shows numbers, rates, positivity rates of those testing positive. Also homes, schools and organisations that have had an outbreak against The national definitions.

COVID Out of Hospital Capacity & Demand

This report shows capacity and demand for hospital, ready for discharge, care homes, domiciliary care, mental health and community providers.

Hospital Admission Report

This report shows the number of COVID admissions and bed availability in hospital trusts.

- ## Reports in Development and available in the coming weeks

COVID in Hospital Demand Prediction Tool (Manchester Model)

This report provides a short term prediction of in hospital COVID bed occupancy split by core and ICU beds.

COVID Monitoring & Tracking

This report shows cases, suspected cases and testing hotspots, with geographic and patient level drill down for those involved in the front line response.

Enhanced Case Finder

This report enables the ability to identify vulnerable cohorts of the population including those advised to shield, with the functionality to drill down to identify patients for targeting of direct care.

Flu Vaccination

This report shows flu vaccination invitation and uptake rates stratified by different characteristics including age, condition and deprivation, and BAME.

COVID Epidemiology

This report shows stratified cases, suspected cases, mortality and people receiving tests by characteristics including age, condition, deprivation and BAME, and over time.
